1 Introduction

1.1 Objectives and purpose

The Daimler AG wants to spread out the EDI activities quickly onto those trading partners who are not able to take part at the common EDI transfer due to missing requirements. The focus is on that trading partners which have applications without EDI possibility or which haven't got the necessary infrastructure. The question of taking part at EDI is a question of costs. Therefore the solution should be available in short terms and without the need of high demands to the technical equipment of the trading partner.

Using the existing EDI interfaces of the applications / data structures of the Daimler AG is another purpose. This means that from the view of the Daimler AG no IT changes have to be done because of establishing the new process.

The EDIweb solution was realised according to the previous reasons. The trading partners of Daimler AG now are able to get their logistic data from a web server hosted by the debis EDI Clearing Center.

1.2 What the EDIweb user has to do

Every EDIweb user (normally the supplier of the Daimler AG) has to connect to the EDIweb server on a daily basis in order to ensure that the incoming delivery instructions of the Daimler AG are checked continuously.

To view the web sites you have to use either Netscape Communicator from 4.xx, Microsoft Internet Explorer from 3.xx or Firefox (in some cases the tables are not centered).

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	3 von 14 Seite
--	---	--	-----------------------------	-------------------------------	-------------------

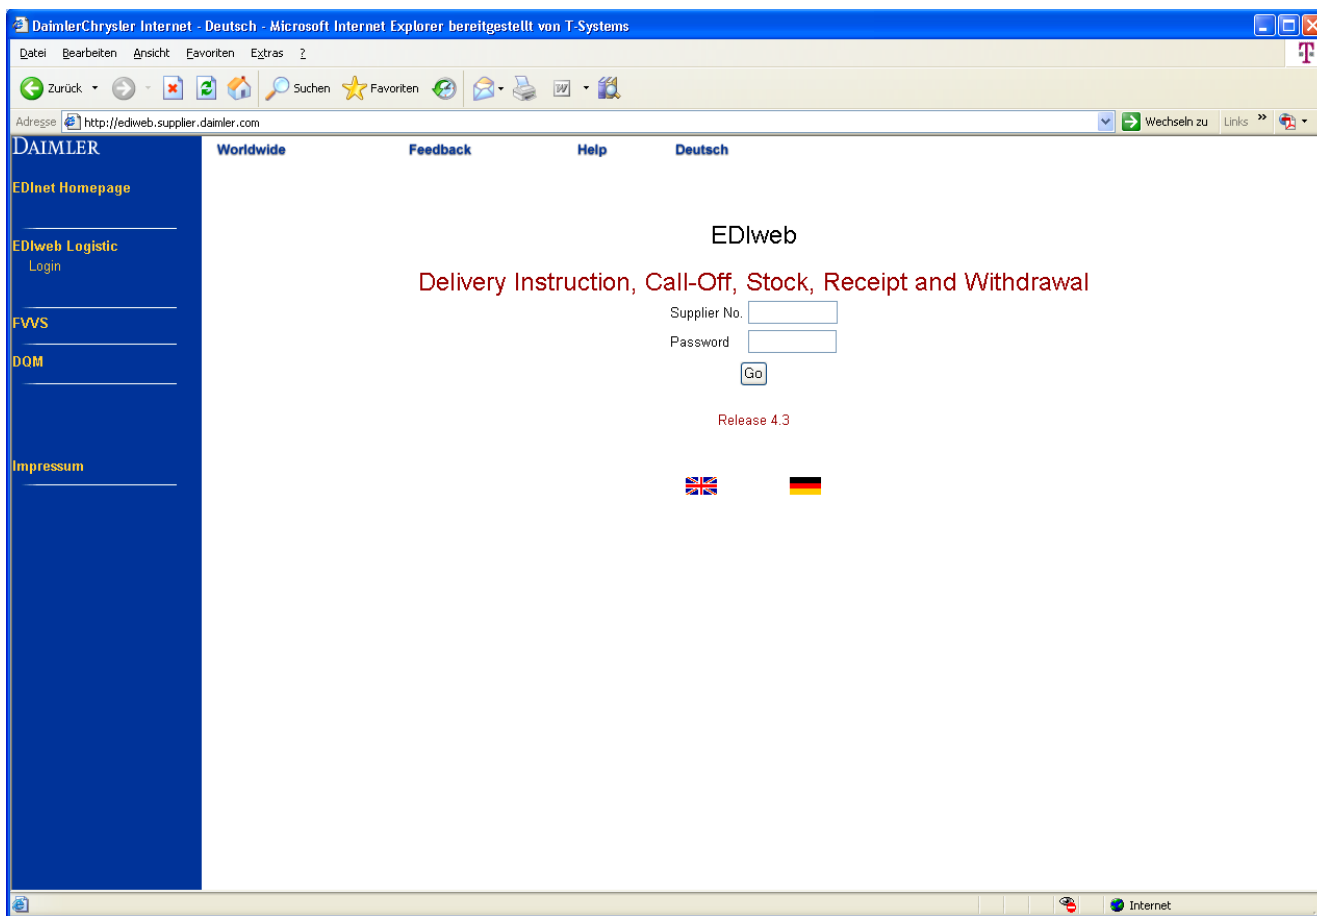

2 EDIweb entrance

The connection to the ENX (European Network Exchange) or the internet is inevitable to use the EDIweb services. If you use the URL <http://ediweb.supplier.daimler.com> you will get to the following page:

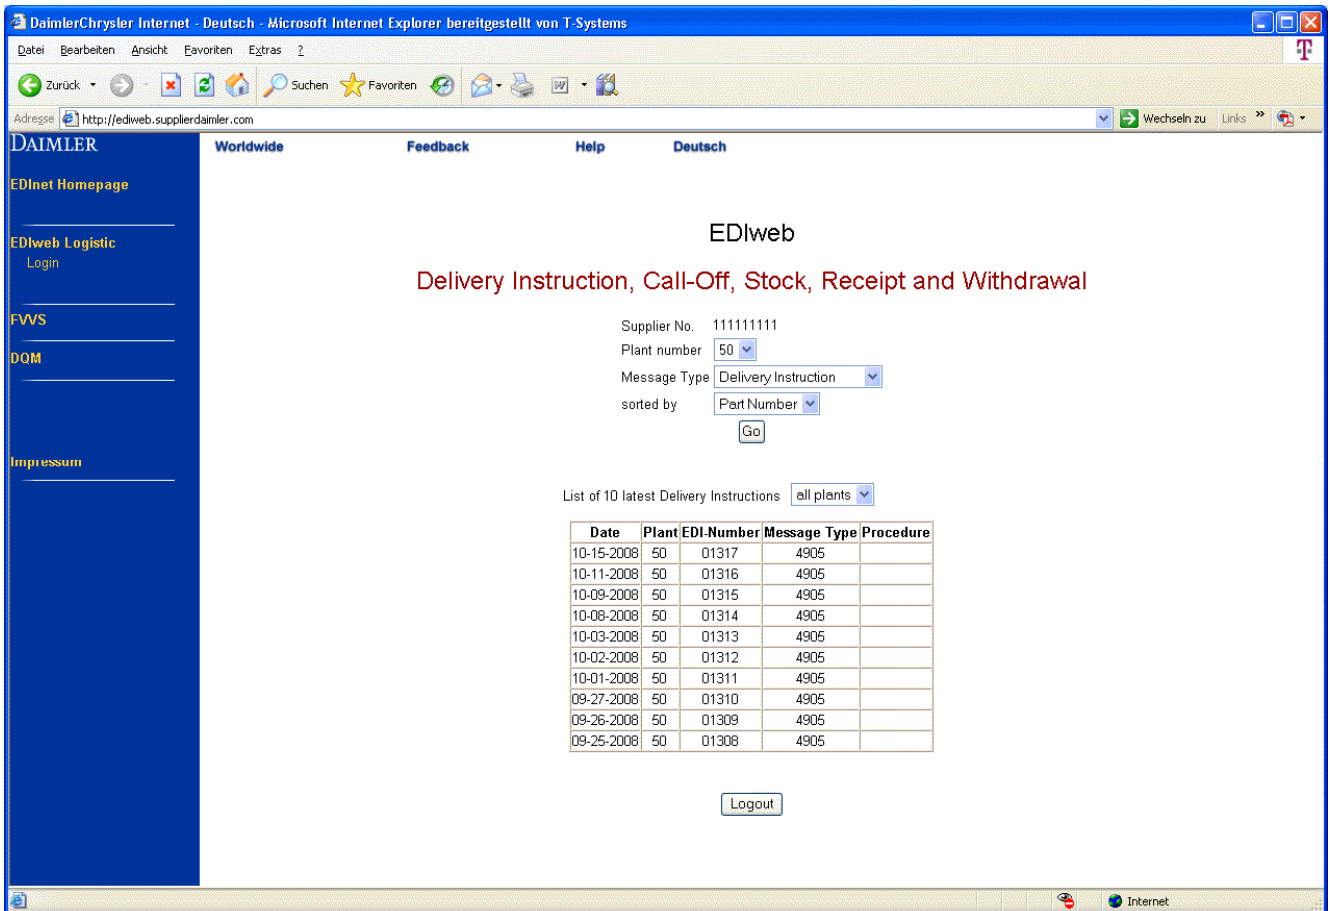

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	4 von 14 Seite
--	---	--	-----------------------------	-------------------------------	-------------------

Please select the link „EDIweb – Logistik english“ at the left side. Afterwards you get the page where the login is requested (normally the supplier number given by Daimler AG). Please insert the data and press the „GO“ button.

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	5 von 14 Seite
--	---	--	-----------------------------	-------------------------------	-------------------

If you have entered the correct data the following selection page appears.

On this page you can choose the individual informations.

- *Plant* – all the plants of the Daimler AG who posted data for the supplier
- *Message type* – delivery instructions or call – off
- *Sorted by* – part number or Date

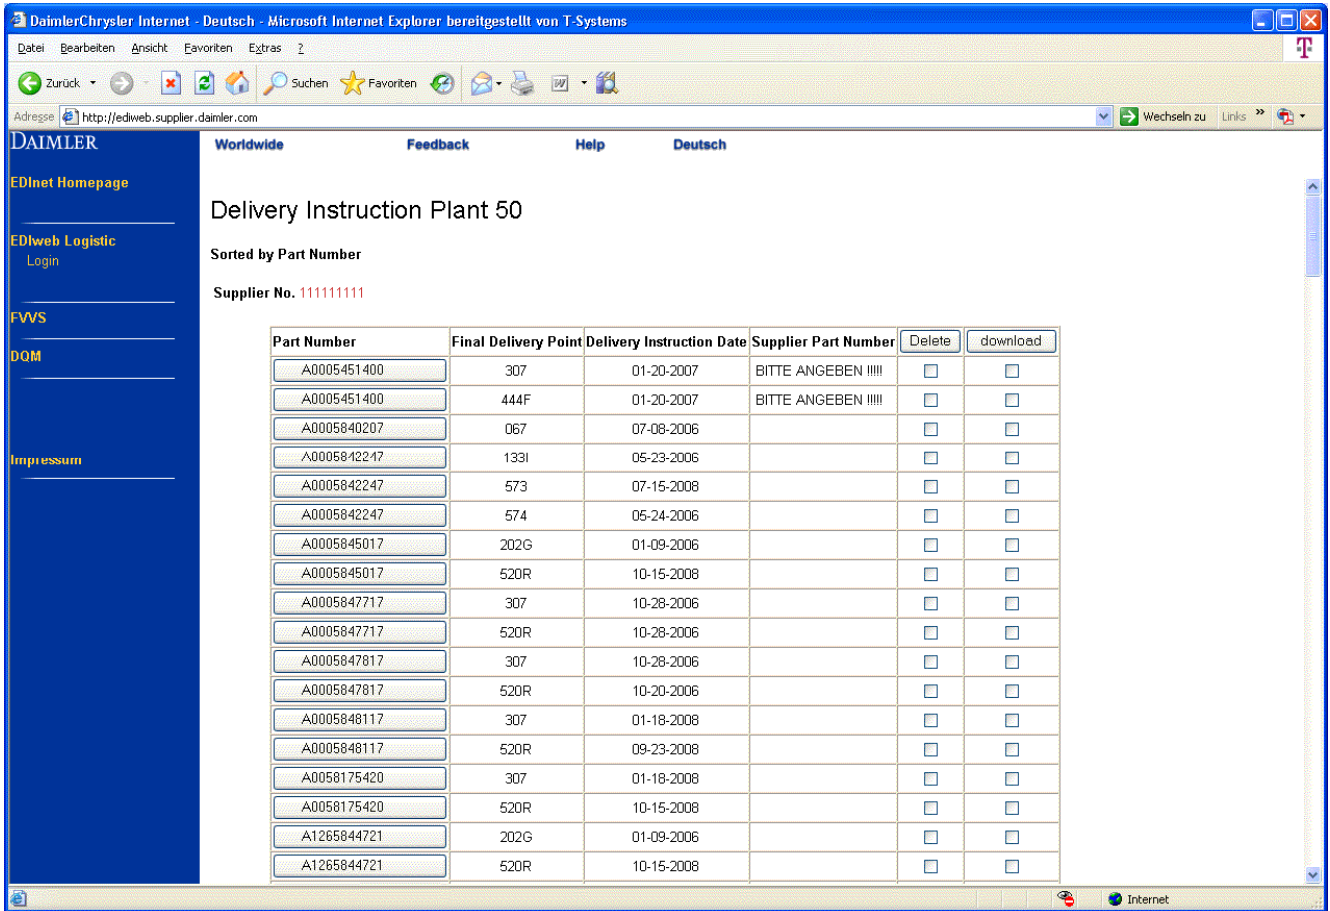

After using the „GO“ button the next page appears.

Choice

- *Sorted by part number* – shows a list of all part numbers with final delivery point and delivery instruction date (date of the data creation by Daimler AG). Each part number can be selected and the delivery schedule of the particular part number is shown. The schedule shows **every single delivery date since the actual day containing a delivery quantity different from zero**. Delivery dates in forecast mode are identified with „forecast“.
- *Sorted by date* – shows a list with **Backlog /Immediate Need** and **every single delivery date since the actual day**. Backlog /Immediate Need shows the part numbers with a backlog or an immediate need unequal zero. If a delivery date is chosen a list containing the part numbers with a quantity different from zero is shown.

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	6 von 14 Seite
--	---	--	-----------------------------	-------------------------------	-------------------

2.1 View - Sorted by part number

On this page you can fade out „old“ or „expired“ combinations (after change of the final delivery point) of part number and final delivery point.

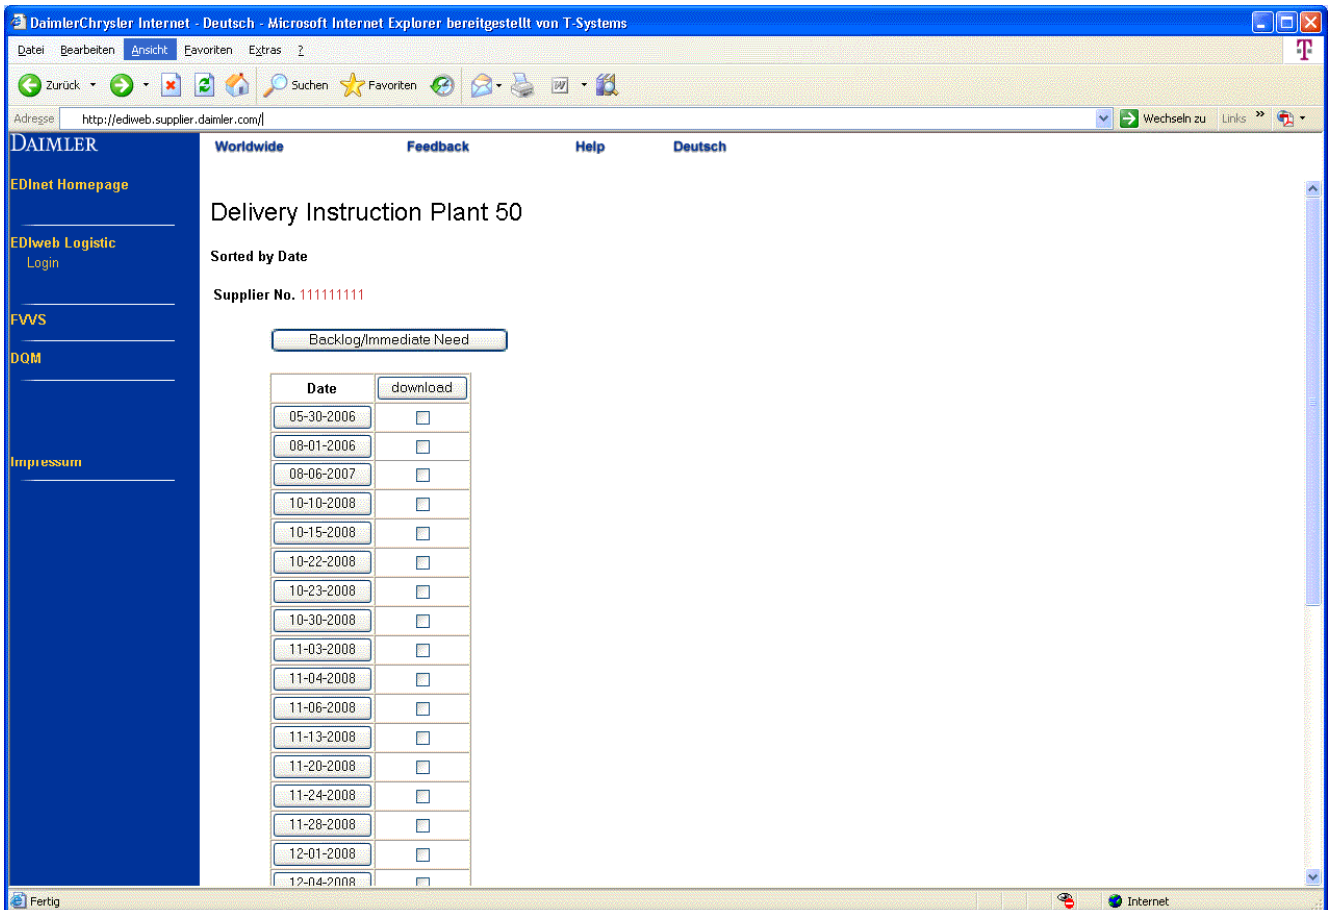

If the plants of Daimler AG generate new data of the particular part number and final delivery point combination the data appears again on this page.

After clicking on the button “Delete” you have to verify the fade out with Yes or No.

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	7 von 14 Seite
--	---	--	-----------------------------	-------------------------------	-------------------

2.2 View – Sorted by Date

At this choice you can select those part numbers which have backlog or immediate need not equal zero.

T-Systems Enterprise Services GmbH Unit BCS	EDI-Customer Support Bearbeiter/Verantwortlicher	D_AG_EDIWEB- HANDBUCH&PARAMETE R_ENG_15_10_2008.DOC Dateiname/Version	27.02.2003 Freigabedatum	15.10.2008 letzte Änderung	8 von 14 Seite

The screenshot shows a web browser window with the URL <http://ediweb.supplier.daimler.com>. The page title is "Delivery Instruction Plant 50". The interface includes a navigation menu on the left with links for "EDInet Homepage", "EDIweb Logistic Login", "FVVS", "DOM", and "Impressum". The main content area displays a table of delivery instructions sorted by backlog/immediate need for supplier number 111111111.

Part Number	Final Delivery Point	Delivery Instruction No.	Delivery Instruction Date	MDI	Backlog	Immediate Need	Last Delivery	Delivery No.	Delivery Quantity	Actual Cumulative QTY Received
